

THE FUTURE OF EEG SUPPORTED PLANTS

SEMINAR, 1 DAY

The main instrument for promoting electricity generation from renewable energies is the Renewable Energy Sources Act (EEG). Although an EEG-subsidised project still offers extensive investment security, the legislator is increasingly transferring risks to the operators. Moreover, the new EEG has been in force since 2021. But what changes have actually been introduced? This seminar addresses the current status of the existing regulations and its future impact on the construction and operation of renewable energies.

Your contents

Overview of the current EEG

- Placement in the energy policy context
- Targets, expansion corridors and support system
- Overview of the most important changes in the 2021 amendment

Tendering system and remuneration structure

- Remuneration structure - the "value to be applied"
- Tender design for PV, wind and biomass
- Tender volumes - gross vs. net
- The new 1-tier reference yield model
- The Wind Energy at Sea Act - conversion to area tenders
- Interpretation of the results of the previous tenders

Feed-in management and grid expansion areas

- RE expansion vs. grid expansion
- Basics of feed-in management
- Grid expansion areas and what they mean
- Connectable loads

Business models with RE Electricity

- Tenant electricity, leasing models, regional electricity models, community electricity and self-supply
- Surcharges and levies for storage facilities and tenant electricity models
- Distribution models with regional certificates

Direct marketing

- The market premium model
- Competitive environment in direct marketing
- EEG electricity and negative prices - the 6-hour rule

Current developments

- Effects of the EU winter package and expected changes
- Innovations in the EEG 2021

TARGET GROUP

- Specialists and managers from the energy sales, corporate planning and development, procurement and trading departments.
- Direct marketers and operators of renewable energy plants
- Investors and project developers
- Representatives of politics and associations

YOUR BENEFITS

After this seminar you will be able to:

- reflect and apply the current status of the EEG,
- evaluate the new regulations for your company,
- identify new business models under the EEG,
- assess the further development of EEG subsidies.

Supplement your market expertise and get ready for the future of renewable energies with the seminars **EEG 2021: are PPAs taking off now?** or **Intensive Seminar: PPA Evaluation and Contract design.**
