

ONLINE-SIMULATION GAME: SHORT-TERM TRADING

How do I optimise spot market revenues for my power plant?

Anyone who trades on the electricity market can earn a lot of money – or lose it. Do you want to be one of the winners? Then this simulation game offers you the opportunity to slip into the role of a trader in order to practise selling power plant capacities on the spot market. In this online simulation game, you sell electricity from a CCGT power plant on the German day-ahead and intraday market. This is a fun way to gain valuable experience for your own job.

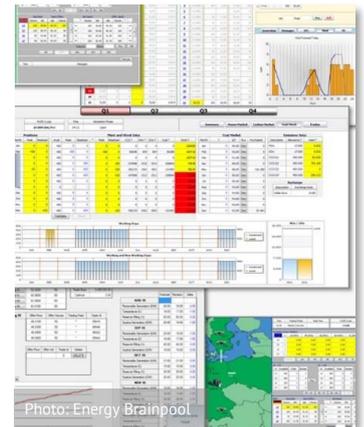

Your contents

Session 1: Introduction to the simulation game and exercises

- Explanation of the game, the processes and the user interface
- Clarification of professional and technical questions about the game
- Step-by-step instructions of a spot market game scenario
- Exercises on buying and selling electricity on the continuous intraday market

Session 2: Game round - Spot Market Germany

- Selling electricity from a CCGT power plant on the spot market (day-ahead, intraday)
- Playing several scenarios
- Discussion and evaluation

System requirements

- Stable internet connection, microphone, webcam (if applicable)
- The best user experience of the game simulation is provided by the Chrome browser
- MS Teams or corresponding compatible web browser (Edge, Chrome)

TARGET GROUP

- Specialists and managers in the electricity industry in the field of energy trading, procurement and sales
- Professionals from trading, marketing of electricity, balancing group, schedule, load or portfolio management of conventional or RE plants
- Newcomers and career changers in the energy sector with basic knowledge of the electricity market

YOUR BENEFITS

After this simulation game you will be able to:

- distinguish between buy and sell signals,
- explain spot market processes, and
- develop trading strategies.

The simulation game is the ideal complement to the seminars **Starter kit electricity industry**, **Revenue potential at short-term energy markets** or **EEG, PPAs and Co: sales options for renewables**.
